

“Almighty God Existed Pre-Creation”

Introduction:

This discussion paper deals with the very early beginning, when our Earth and our universe did not exist. Almighty God exists regardless. In the main, the discussion is about the fundamental beginning or Pre-Creation. In scripture quotations throughout this article, Almighty God uses male gender¹ and His personal name is Allah. Whenever references are made to the Holy Qur’an, those quotations will have prefix of **HQ** followed by **chapter: verse** numbers (e.g. **HQ2:117**).

Discussions on the Beginning, Before Creation of Our Universe:

- 1)** Often misunderstood because of misinformation, some people believe that when Almighty God created our universe comprising of the Sun and 8 planets², then that was the first time Almighty God had ever created everything! Their understanding was based on what they were taught, when some of these people were children. An obvious question arises: what all was Almighty God doing, before His creation of our universe³? It is indeed imperative to correctly understand the following facts: Almighty God does not have a Beginning to roll back to a certain point in time, as date of His Commencement; He has no Commencement⁴ and He is not made of visible material. He does not age and He will never reach a

¹ Almighty God is not a body type material and genderless but uses the title of Lord, which concludes use of male Gender. There are so many other similar titles, which He used most appropriately in the Holy Qur’an.

² Taking our Sun as at the centre of our universe, the following planets are positioned within our universe, moving away to right of the Sun, with progressive increasing radius intervals in the following orbital motions: Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, and Neptune. Mercury is closest to the Sun and Neptune is farthest away. All 8 planets revolve anticlockwise around the Sun.

³ There were already thousands of universes within the Milky Way Galaxy, when Almighty God created our universe. The outer space has many other universes, which are still being discovered by the Hubble telescope, since year 1990. The Hubble telescope orbits earth every 97 minutes at speed of 5 miles per second (8km sec) at height of 353 miles (569km) above earth. Originally, people thought our universe was the only universe and hence it was called with “uni” prefix. The “uni” name rolls back to French, Latin and Greek words of similar references. Now scientists refer to the outer space as “the multiverses.”

⁴ Almighty God does not have a birth date, because He was never born or has an originating point: As the obvious question would arise: “then who created God?”

maturity; He will never succumb finally to the termination of His Superlative Existence. Almighty God is the unimaginable Superlative Power and He was already existing before He created the Milky Way⁵ and our universe. The Holy Qur'an stipulates that whatever Almighty God desires in His infinite wisdom, He only commands and that process commences immediately, according to His laws on that affair: **HQ2:117** *"Wonderful Originator of the heavens and the earth! And when He decrees an affair, He says to it only, Be, and it is."* Another key point to remember at all times is that Almighty God is the King of His Kingdom of God and that He has always addressed His presence, using Royal plural, notwithstanding that He is always One, as shown in the following two comparative verses at **HQ51:47** *"And the heaven, We raised it high with power, and We have made the vast extent."* **HQ29:56** *"O My servants who believe, surely My earth is vast, so serve Me only."* The incomparable uniqueness of Almighty God is exemplified in His incessantly routine services to everything in the universe, as stated at **HQ29:61** *"And if you ask them, Who created the heavens and the earth and made the sun and the moon subservient, they would say: Allah. How are they then turned away (from truth)!"* Bearing in mind that Almighty God is not visible material, hence on a comparative note for better understanding, "one day" of His Own statement, is by human material times of 24 hours daily the equivalent to fifty thousand human years! This stipulation is at next two quotes: **HQ70:4** *"To Him ascend the angels and the Spirit in a day the measure of which is fifty thousand years."* **HQ45:36** *"So praise be to Allah, the Lord of the heavens and the Lord of the earth, the Lord of the worlds!"* Almighty God always existed superlatively (without the beginning), before anything else existed, as the Provider and the Protector, as given at another two verses: **HQ59:22-24** *"He is Allah besides Whom there is no God: the Knower of the unseen and the seen; He is the Beneficent, the Merciful. He is Allah, besides Whom there is no God: the King, the Holy, the Author of Peace, the Granter of Security, Guardian over all, the Mighty, the Supreme, the Possessor of greatness. Glory be to Allah from what they set up as partners⁶ (with Him)! He is Allah, the Creator, the Maker, the Fashioner: His are the most beautiful names. Whatever is in the heavens and the earth declares His glory; and He is the Mighty, the Wise."* **HQ35:1** *"Praise be to Allah, the Originator of the heavens and the*

⁵ Greeks named our Galaxy as Milky Way because of its spiral composition, resembling spilt milk.

⁶ Almighty God is One and He is not visible material. He has no partner, no associate, no assistant, no spouse, no offspring and no heir in line of succession, because He will not die and will not need a successor.

earth, the Maker of the angels, messengers flying on wings, two, and three, and four. He increases in creation what He pleases. Surely Allah is Possessor of power over all things.”

2) Sometimes, certain people consider the entire universe as a recent event, which all happened in just a few days. According to Scientists, our Universe is around 13.8 billion⁷ years old. It is imperative to understand the absolute might of Almighty God. The entire universe commenced when it exploded like a nuclear bomb, from a tiny source of extremely hot ball of superlative energy as the core. This explosion caused outward location positioning into the space, of the planets in the following order, moving away from the Sun as finally positioned into orbiting radius: Mercury; Venus; Earth; Mars; Jupiter; Saturn; Uranus; Neptune. Each of these planets is floating in its own orbit and none crosses the orbital paths of the others, and not causing collisions. Whilst all of Universe is scientifically assessed to be 13.8 billion years old and Earth at 4.9 billion years old, on the contrary, scientists are still trying to establish the age in billions of years of the entire Galaxy of the Milky Way system.

3) The Supremacy of Almighty God to create the Milky Way and our Universe is reflected in the Big Bang⁸ Theory. There is need to

⁷ The age of our universe of 13.8 billion years was ascertained by study of residual radioactive isotopes. According to scientists from their study of decay of radioactive isotopes residual in the Milky Way Galaxy, there have been many other universes like our universe, which have also served their duration and then disappeared into Black Holes. When Albert Einstein had put forward his theory of relativity, he also explained the Black Hole Theory and the ultimately bending of light. There are also visible gaps within the Milky Way Galaxy, which hints the disappearances of some previous universes. Black Holes is the end result, when after a universe was created with its Sun and all its own planets had reached their full outward expansions motions with inertia. Then the planets' inertia becomes neutral and because of its internal magnetic gravity, will retract the earlier motions, implode with extremely strong gravity, greatly diminish in size and spontaneously accelerate to speed of light back to its point of commencement, and then disappear into Black Holes at the speed of light. Black Holes develop incredible energy including light into central core called the Singularity. Nothing escapes Black Holes – not even light. The Holy Qur'an is cognizant of the existence of Black Holes. The occurrence of Black Hole also implies the "End of World" for those planets affected.

⁸ According to Scientists the Big Bang Theory is about how exactly the universe systems started in the entire open space. This theory was by Catholic priest Fr. Georges Lemaitre. It is how the all the universes have come together to consolidate and form the Milky Way Galaxy, as a case study, as we have today. According to scientists, each of the universes started with an extremely strong and extremely powerful mix of 4 cosmic forces, which expanded out with a terrific big bang, like a nuclear explosion. This bang sent out gigantic forces of extremely hot energy matter, which dispersed into different directions, spinning and cooling off into becoming like planets. The point of commencement is a single atomic point: the *Singularity*.

appreciate that the Big Bang Theory is a modern time's English language expression, whereas the fundamental principles of that theory were already explained in the Holy Qur'an more than 1,400 years ago. This is explained in the next three quotations as follows: **HQ21:30** *"Do not those who disbelieve see that the heavens and the earth were closed up, so We split them apart. And We made from water everything living. Will they not then believe?"* **HQ11:7** *"And He it is Who created the heavens and the earth in six periods; and His Throne of Power is ever on water that He might manifest (the good qualities in) you, whoever of you is best in deeds. And if you say, You shall surely be raised up after death, those who disbelieve say: This is nothing but clear deceit."* **HQ2:29** *"He it is Who created for you all that is in the earth. And He directed Himself to the heaven, so He made them complete seven heavens; and He is Knower of all things."* What a contrast!

- 4) It is indeed imperative to reiterate the absolutely superlative magnificence of Almighty God, and Who has both the unfettered capacity and the unfettered capability to create anything out of nothing! The capacity and capability is not limited to our universe, which is extremely small compared to so many other thousands of very large universes throughout the Milky Way Galaxy. Almighty God has the Supreme Capacity to repeat His Creation all over, innumerable times. The combinations of the unfettered capacity and the unfettered capability also comes with unconditional open challenge to those people who have chosen to worship other descriptions of gods. These are challenged in the next two verses: **HQ10:1** *"I, Allah, am the Seer. These are the verses of the Book, full of wisdom."* **HQ27:64** *"Or, Who originates the creation, then reproduces it, and Who gives you sustenance from the heaven and the earth? Is there a god with Allah? Say: Bring your proof, if you are truthful."*
- 5) It becomes most obvious that there is no definite time of commencement before Almighty God created our universe. Almighty God has His own programme of steady creations of new universes, similar to the Big Bang Theory, and in a balance, He has His own programme of destruction of older universes, similar to the Black Hole Theory. Only Almighty God is in total control.

Conclusions of Discussions on Pre-Creation as in the Beginning:

- a) There is no exact beginning of Almighty God and His widespread universes within so many galaxies, yet to be discovered and named.

- b) Almighty God is timelessly existing. The principles of time, material and fatigue do not affect Him.
- c) When our universe commenced, there were thousands of universes already positioned within the Milky Way Galaxy.
- d) There is no limit to numbers of galaxies Almighty God creates.
- e) Universes commence with Big Bang Theory and will end with Black Hole Theory⁹ and these have been explained with details in Footnotes.
